Paul V. Ingram III

Riverside, CA 92507 | pvingram3@gmail.com | (949)-566-3506 | LinkedIn | GitHub | Personal Website

Education

B.S. in Computer Science - *University of California, Riverside* Sept. 2024 - Jun. 2026

- **Overall GPA:** 3.78 / 4.0

A.S. in Computer Science - *Riverside Community College* Jun. 2021 - Jun. 2024

- **Overall GPA:** 3.92 / 4.0

Technical Skills

Programming Languages: C/C++, Java, Python, Lisp (Scheme), Assembly, Rust
Web Development: JavaScript, HTML, CSS, Next.js, TailwindCSS
Python Libraries: pandas, seaborn, NumPy, Matplotlib, SciPy, ROS
DevOps & Tools: Git, GitHub Actions, Polygon for Codeforces, Visual Studio Code

Projects

Senior Design: OS Kernel Exploitation | *C, Linux, Android*

- Studied **Linux** and **Android kernel** internals through hands-on exploitation of real-world **CVEs**
- Analyzed vulnerability reports and public exploits to reproduce **kernel-level** attack primitives in **C**
- Ported exploits to alternate OS versions, validating understanding of **kernel version differences**

AI for Robotics Final Project | *Python, ROS, RViz, Matplotlib* GitHub

- Simulated **autonomous path planning** and **SLAM** mapping in **ROS** using **Python**
- **Dijkstra-based** planner over occupancy grids with **RViz** waypoint selection for interactive route control
- Benchmarked path planning algorithms with **Matplotlib** to compare **runtime and space complexity**

Data Science Mini Project | *Python, pandas, Matplotlib* GitHub

- Cleaned and aggregated public survey data with **Python** and **pandas** for **exploratory data analysis**
- Visualized trends with **Matplotlib** to surface **statistically significant** relationships via **hypothesis testing**

Intro to Competitive Programming | *C++, Python, Polygon* Codeforces

- Created problems on **Polygon** with **C++** and **Python** test case generators for **92 enrolled** students
- Wrote solution templates and refined problem descriptions; hosted **online lectures** and organized curriculum

Experience

Undergraduate Research Assistant - *University of California, Riverside* Jan. 2026 - Present

- Reproduced Android application **CVEs** in user space by analyzing **vulnerability reports** and executing publicly available **proof-of-concept (PoC) exploits**
- Designed and implemented a **data collection workflow** to scrape and curate **33 Android CVEs** from public **vulnerability databases**
- Assisted in evaluating **automated vulnerability analysis** tooling by importing target **APKs** and curated **CVE datasets**

Leadership

Grader - *University of California, Riverside* Jan. 2026 - Present

- CS 105 (Data Analysis Methods): Helping with grading labs and quizzes for a class of ∼100 students
- CS 111 (Discrete Structures): Helping with grading assignments and quizzes for a class of over 150 students

President – ACM Student Chapter - *Riverside Community College* Aug. 2022 - Jun. 2024

- Led competitive programming workshops and coordinated technical programming events
- Conducted outreach by developing introductory competitive programming activities and delivering guest lectures to high school students
